SUMMARY

Computer Engineering graduate (System Development) from the Polytechnic University of the Philippines with hands-on experience across full-stack web development, backend services, and applied AI/ML. Comfortable building and shipping production-grade software with REST APIs, clean architecture, and Agile workflows - from responsive front ends to machine-learning pipelines and their deployment.

EDUCATION

Bachelor of Science in Computer Engineering 2022 - 2026

Polytechnic University of the Philippines, Sta. Mesa - Major in System Development

EXPERIENCE

Software Engineering Intern AUG - OCT 2025

American Express

- Developed and maintained backend services and internal tools for production-grade systems in a global financial-services environment, working within a **10-person software engineering team** through code reviews and Agile sprints.
- Shipped **50+ features** across **6 sprints** through Git-based CI/CD pipelines, writing code that cleared peer review and integrated into enterprise applications.

IT Operations JUL - SEP 2025

Concentrix - EXXA

- Monitored, diagnosed, and resolved **200+ tickets per week** across internal infrastructure, helping sustain **98% uptime**.
- Rolled out internal tools alongside technical teams and documented recurring issues, reducing repeat incidents by **30%**.

Full-Stack Web Developer Intern JUL - SEP 2024

ROC.PH

- Delivered **15+ responsive web pages** backed by REST APIs, spanning front-end UI and database-layer features.
- Implemented secure authentication, database integrations, and **10+ REST endpoints** for an app serving **400+ users**, built across Agile sprints with peer code reviews.

PROJECTS

MiraFit AI

Python · Flask · MediaPipe · YOLOv8 · TensorFlow Lite · Google Gemini 2.5

- Built a real-time pose-estimation and exercise-validation pipeline (MediaPipe + YOLOv8) reaching **95% rep-counting accuracy** across **100+ test users** and **100+ gym sessions**, with live form feedback and no wearables.
- Deployed the pipeline to a Raspberry Pi as an on-device (edge) **model-deployment pipeline** running real-time at **60 FPS**; range-of-motion validation drove the accuracy gains.
- Integrated Google Gemini 2.5 (LLM) via prompt engineering to generate personalized workout and meal plans from body type, health conditions, and dietary restrictions, with an adaptive engine tuning intensity and nutrition.

CpE Hardhatting Ceremony 2026

Next.js 16 · React 19 · TypeScript · Tailwind CSS · Supabase (Postgres / Auth / Realtime) · Vercel

- Solo-developed the official QR-pass, check-in, and reserved-seating platform for the PUP Computer Engineering Hardhatting Ceremony, serving **382 attendees** across **8 class blocks**.
- Engineered invite-based onboarding, JWT-signed QR passes with a live seat map, a full-screen camera check-in scanner, and a real-time admin dashboard with role-based access enforced via Supabase Row-Level Security.

MiraFit Admin Dashboard

PHP · MySQL · Apache · JavaScript · HTML/CSS · Node.js

- Designed and built a centralized admin platform managing **100+ user accounts**, workout data, and AI-generated plan statistics, **deployed and maintained in production**.
- Developed analytics modules tracking **4+ engagement and system-health metrics** - active users, plan-completion rates, engagement, and backend/AI-server health.

TECHNICAL SKILLS

LANGUAGES: Python, JavaScript, TypeScript, PHP, C++, SQL, HTML/CSS, Bash

AI / ML: PyTorch, TensorFlow, TensorFlow Lite, MediaPipe, YOLOv8, OpenCV, scikit-learn, LLM integration, Google Gemini, prompt engineering, model deployment, MLOps, MLflow, Weights & Biases, NumPy, Pandas

WEB & BACKEND: Next.js, React, Redux, Context API, Tailwind CSS, Node.js, Flask, FastAPI, Express, PHP, Supabase, MySQL, PostgreSQL, MongoDB, REST APIs

TOOLS & DEVOPS: Docker, Git, Google Cloud, GCP, Apache, Cloudflare Tunnel, Linux, Vercel, CI/CD, Agile/Scrum, pytest, Jest, React Testing Library

CERTIFICATIONS & LANGUAGES

CERTIFICATIONS: CCNA - Introduction to Networks (Cisco), Introduction to Generative AI, Deploy and Manage Generative AI Models, Generative AI for Developers

LANGUAGES: English (Professional), Filipino (Native)
