PROFILE

Computer Engineering graduate from the Polytechnic University of the Philippines specializing in System Development, with a strong interest in Artificial Intelligence and Machine Learning. Experienced across full-stack applications, backend services, and AI-driven systems — driven by clean architecture and shipping reliable products.

EDUCATION

Bachelor of Science in Computer Engineering 2022 — 2026
Polytechnic University of the Philippines, Sta. Mesa — Major in System Development

EXPERIENCE

Software Developer Intern AUG — OCT 2025
American Express

- Contributed to enterprise software projects in a global financial services environment, collaborating with senior engineers on production-grade systems.
- Developed backend services and internal tools, applying Agile workflows, version control, and code review best practices to ship reliable features.

IT Operations JUL — SEP 2025
Concentrix — EXXA

- Supported day-to-day IT operations including system monitoring, troubleshooting, and incident resolution across internal infrastructure.
- Coordinated with technical teams to ensure uptime, deploy internal tools, and document recurring incidents to drive process improvements.

Full-Stack Web Developer Intern JUL — SEP 2024
ROC.PH

- Developed responsive web applications using modern front-end frameworks and back-end APIs, contributing to both UI and database-layer features.
- Collaborated in an Agile environment to plan sprints, conduct code reviews, and implement secure authentication and database integrations.

SELECTED PROJECTS

MiraFit AI
Python · Flask · MediaPipe · YOLOv8 · TensorFlow Lite · Google Gemini 2.5

- Engineered a real-time pose-estimation and exercise-validation pipeline using MediaPipe and YOLOv8, enabling accurate rep counting and live form feedback without wearables.
- Integrated Google Gemini 2.5 to generate personalized workout and meal plans based on user body type, health conditions, and dietary restrictions.
- Built an adaptive recommendation engine that dynamically adjusts workout intensity and nutrition; range-of-motion validation significantly reduced rep-counting errors.

MiraFit Admin Dashboard
PHP · MySQL · Apache · JavaScript · HTML/CSS · Node.js

- Designed and built a centralized admin platform for managing user accounts, workout data, and AI-generated plan statistics across the MiraFit ecosystem.
- Developed analytics modules tracking active users, plan completion rates, and engagement; integrated health monitoring for backend services and AI servers.
- Created scalable user-management tools supporting secure, reliable operation across multiple deployments.

TECHNICAL SKILLS

LANGUAGES	Python, JavaScript, TypeScript, PHP, C++, SQL, HTML/CSS, Bash
AI / ML	PyTorch, TensorFlow, TensorFlow Lite, MediaPipe, YOLOv8, Google Gemini, scikit-learn, OpenCV, NumPy, Pandas
WEB & BACKEND	Next.js, React, Node.js, Flask, FastAPI, Express, PHP, MySQL, PostgreSQL, MongoDB, REST APIs
TOOLS & DEVOPS	Docker, Git, Apache, Cloudflare Tunnel, Linux, Vercel, CI/CD, Agile/Scrum

CERTIFICATIONS & LANGUAGES

CERTIFICATIONS CCNA — Introduction to Networks (Cisco) · Introduction to Generative AI · Deploy and Manage Generative AI Models · Generative AI for Developers
LANGUAGES English (Professional), Filipino (Native)
